

# NETWORK SUPPORT SERVICES

Every small business today depends on technology. But as the pool of available technology grows, choices about what technology to use and how to support it are getting harder to make.

Cray Networks aims to become your IT department while working alongside any internal resources. This allows your company to focus on its core business without the worry of keeping up with the latest technology. We can assess your requirements, devise a strategy, install equipment and applications, provide training - then help you support and maintain your network. Our specialized services include:

- ⇒ Scheduled Onsite Service
- ⇒ Per Incident Onsite Service
- ⇒ Secure Remote Support

Whether you are interested in upgrading your current network, require long-term technical support or just need some help in knowing how to utilize the latest software applications and equipment in your environment, Cray Networks is the solution for you.
